

F. S. Jones writes visionary fantasy–suspense that splices **cosmic mystery** with **high-velocity adventure**. His stories push past the edges of the known—into parallel worlds, stretched time, and the strange “nothingness” between light and dark—asking the biggest question of all: *what if?*

From childhood, Jones was drawn to the universe’s riddles—what existed before existence, what hides beyond perception, and how choices echo across realities. That curiosity fuels novels where **philosophical stakes** meet **pulse-pounding set pieces**, and where found-family heroes break rules to save what matters.

Off the page, Jones chases wonder the same way his characters do: skydiving through cold blue, diving into quiet depths, and climbing remote peaks. Those real-world edges give his fiction its grit—otherworldly ideas anchored in human courage.

Jones writes for seekers and boundary-breakers who believe imagination isn’t an escape from truth but a path toward it. If you’ve ever asked *what if*—and meant it—these stories are your doorway.
